

**GET MORE FREEDOM AND FLEXIBILITY WITH BLUETOOTH DESIGNED FOR BUSINESS**

# MOTOTRBO™ OPERATIONS CRITICAL WIRELESS ACCESSORIES

Your people rely on clear, continuous communication wherever their work takes them. And you rely on the MOTOTRBO™ professional digital radio system to keep them connected, current and collaborative.

From the grounds crews on a golf course to security personnel at a sporting event to the receptionist in a hotel, sharing information instantly and easily is absolutely critical – operations critical – to running business smoothly.

With MOTOTRBO Operations Critical Wireless accessories, you'll find flexible, cost-effective Bluetooth® solutions that give your people more freedom in their communications and more mobility in their work day. So they can move without wires, converse discreetly and even take their radio off their belt whenever the job requires it.

## COMFORT AND CLARITY YOU CAN COUNT ON

Whether a maintenance crew wants to leave their radios by their toolbox and connect within easy reach (up to 10 metres away) or a security team wants to wear covert earbuds that look just like a consumer device, MOTOTRBO has an accessory that fits their activities and your operations perfectly.

Ruggedly reliable and Bluetooth certified, our progressive portfolio ranges from lightweight, high-performing earbuds and earpieces to a wireless push-to-talk (PTT) pod you can put in a pocket and link to any accessory. All without the inconvenience of wires that can get caught or tangled.

Our earbuds and earpieces provide voice communication with exceptional clarity and the freedom to move even without the radio attached to your hip. Now the groundskeeper can conveniently leave his radio in the cart and still communicate while trimming bushes or the hotel receptionist can leave the radio on the desk and confer unobtrusively with staff while welcoming guests.

And with a quicker call set-up time than standard commercial Bluetooth devices, you can feel confident your people will hear every word – to get quantities right, room numbers correct and addresses accurate.

# WIRELESS THAT IS SEAMLESS AND EFFORTLESS

We offer a variety of wireless accessories that range from simple, low-cost, and discreet earbuds to rugged, high performance earpieces.
